

ADEKUNLE AJASIN UNIVERSITY, AKUNGBA-AKOKO, ONDO STATE

INSTITUTE OF PART-TIME PROGRAMMES (IPTP)

DEPARTMENT OF COMPUTER SCIENCE

WEEKLY CONTINUOUS ASSESSMENT TEST (CAT) 2

NAME: ADEWUSI GIFT ADEOLA

MATRIC NO/REG. NO: 240813030

MATERIAL NO: 003

LEVEL: 300

COURSE: CSC308

PROJECT TITLE: IRO (Issues Reporting Outlet)

LECTURER IN CHARGE :

Dr. Olusola Ajayi

Software Requirements Specification (SRS)

1. Introduction

a. Purpose: The purpose of this document is to define the functional, non-functional, and data requirements for the "IRO" (Issues Reporting Outlet) web application.

b. Scope: IRO is a centralized, web-based platform tailored for Adekunle Ajasin University, Akungba-Akoko (AAUA) students and residents of host/neighboring communities (Akungba, Iwaro, Etioro, Ayegunle). The system enables rapid reporting, mediation tracking, and anonymous alerting of community tensions, security threats, accommodation disputes, and public welfare issues.

2. Overall Description

a. Product Perspective: A lightweight, mobile-responsive web portal accessible by students and indigenes.

b. User Classes & Characteristics:

Studentuser: Reports campus-community friction, landlord disputes, or safety concerns.

Indigene/Resident User: Reports community disturbances, property damages, or civic issues.

System Admin / Mediator: Joint panel (SUG leaders and community elders/police liaison) monitoring and resolving logged issues.

c. Operating Environment: Modern web browsers (Chrome, Edge, Firefox, Safari) across mobile and desktop devices.

3. Specific System Requirements

a. Functional Requirements (FR):

FR-01 (Demographic Capture): The system shall allow users to identify as either an "AAUA Student" or a "Community Indigene".

FR-02 (Location Tagging): The system shall provide a dropdown selection of affected host communities (Akungba, Iwaro, Etioro, Ayegunle, Other).

FR-03 (Incident Categorization): Users shall classify reports under specific domains (e.g., Security, Landlord/Tenant, Price Dispute, Harassment).

FR-04 (Anonymity Option): The system shall provide an optional toggle allowing users to submit complaints completely anonymously.

FR-05 (Issue Feed / Tracking): The system shall display submitted reports in a real-time tracking dashboard indicating the status (Pending, Under Review, Resolved).

b. Non-Functional Requirements (NFR):

NFR-01 (Usability): Clean, intuitive UI requiring no user training.

NFR-02 (Performance): Page load times under 2 seconds on standard mobile network connections.

NFR-03 (Security & Confidentiality): Anonymous reports must strip all identifying metadata to protect whistleblowers.

Use Case Specification

1. Actors

Primary Actors: AAUA Student, Community Indigene.

Secondary Actor: Community Mediator / System Admin.

2. Use Case Descriptions

Use Case 1: Submit Issue Report (UC-01)

Actor: Student or Indigene.

Preconditions: User has accessed the IRO web portal.

Main Flow:

User selects their stakeholder role (Student / Indigene).

User selects the community location (e.g., Akungba, Iwaro, Etioro, Ayegunle).

User chooses the issue category.

User enters the title and detailed description of the incident.

User checks or unchecks the "Submit Anonymously" option.

User clicks the "Submit Report" button.

System validates inputs, assigns a unique Report ID, saves the record, and displays a success confirmation.

Postconditions: Report appears on the issue dashboard with the initial status Pending.

Use Case 2: View and Filter Issues (UC-02)

Actor: Student, Indigene, or Admin.

Main Flow:

User navigates to the "Community Feed / Issues Tracker" tab.

User selects a filter criteria (e.g., Location: "Iwaro" or Status: "Pending").

System displays all matching non-confidential reports with their current resolution status.

Use Case 3: Update Issue Status (UC-03)

Actor: System Admin / Community Mediator.

Main Flow:

Admin views an escalated dispute.

Admin verifies the report and updates status to Under Review or Resolved.

System updates the live dashboard.

Object Listing (Data Model Entities)

User

UserID (Integer, Primary Key)

Role (String: Student / Indigene)

Community (String: Akungba / Iwaro / Etioro / Ayegunle)

ContactInfo (String, Optional)

IssueReport

ReportID (String/UUID, Primary Key)

StakeholderType (String: Student / Indigene)

Location (String: Akungba, Iwaro, Etioro, Ayegunle)

Category (String: Security, Rent, Price, Social)

Description (Text)

IsAnonymous (Boolean)

Status (String: Pending, Under Review, Resolved)

Timestamp : DateTime (Submission date and time)
